Doctors Pain Clinic Names New Practice Administrator

[BOARDMAN, OHIO]--- Jim Thompson has recently been selected as the Practice Administrator for the Doctors Pain Clinic, a regional pain management practice based in Boardman, Ohio with locations in Salem, Warren, Akron and Hermitage, Pennsylvania.

Thompson has 20 years of experience serving in executive management and CEO roles in the healthcare and software/technology sector. Most recently, Thompson served as Senior Project Manager for NEO HealthConnect, a non-profit regional extension center funded through the American Recovery & Investment Act that assisted primary health care providers with the adoption of electronic health record systems and helping attain meaningful use of their technology. Thompson earned a Bachelor of Science Degree in Business Administration from Youngstown State University.

"I am excited to have the opportunity to join this talented team of physicians, clinicians and dedicated administrative management and support staff. Doctors Pain Clinic has established itself as a leading provider for management of chronic pain within the region," states Thompson.

About Doctors Pain Clinic: (www.doctorspainclinic.com) Based in Boardman, Ohio, Doctors Pain Clinic is regional, multi-disciplined and comprehensive pain management center. A team of highly skilled board certified pain management specialists, advanced practice nurses, and registered nurses provide the most treatment options available for the management of chronic pain in the region. Doctors Pain Clinic's pain management specialists see patients at a variety of locations in Northeast Ohio and Western Pennsylvania. In Ohio: Boardman, Akron/Barberton (Summa Barberton Hospital), Salem, Warren (*St. Joseph Pain Management Center*) and in Western Pennsylvania: Hermitage.

About Chronic Pain: Chronic pain affects an estimated 116 million American adults – more than the total affected by heart disease, cancer, and diabetes combined. Chronic pain, which is defined as pain that lasts for more than three to six months, is a disabling condition, not simply a symptom of another disease or condition, and it can be either intermittent or continuous. For some, chronic pain is so severe that it interferes with working, eating, participating in physical activity and enjoying life.
